Why hire off-duty police officers versus security guards? Law Enforcement Specialists guarantee that all of their off duty police officers will take enforcement action immediately, whereas security guards are only trained to observe and then call 911. They are able to arrest, search and seize, and can always call for backup whereas, security guards are rarely armed and can only observe and call 911. Most importantly, off duty police officers have the background training and knowledge in handling people in all situations and are always held accountable just as they are when on duty for the department.
